

WINDING ROOM – DM REFERENCE

START: UW west · UE mid · LW mid · LE east – sealed (upper open E, lower open W)

CHAIN	WEIGHT	EFFECT
G2	LW←	opens I5 · closes I2 <i>FIRST PULL: traps puller in gallery, frees golem</i>
G6	LW→	opens I2 · closes I5 <i>re-arm chain; pulled inside = sealed in cage</i>
M3	LE←	opens I8 · closes I5
K2	LE→	opens I5 · closes I8
B4	UW→	opens E2 · closes E5 <i>backroom</i>
C3	UW←	opens E5 · closes E2 <i>backroom, endgame control</i>
L2	UE←	opens E8 · closes E5
C8	UE→	opens E5 · closes E8 <i>Fritz's chain: seals the puller in his corner</i>

RULES

Pulling a chain = 1 action. Chains are reusable; they grind or jam audibly. Each weight blocks its outer lane OR the middle. Middle bay is shared – one weight per rail may hold it; the other JAMS.

Each rail always leaves exactly one lane open.

Caught in a sliding weight's path: DEX save, dive adjacent; fail 1d6 + prone.

Trace a chain (action + easy Investigation) to learn its weight + direction.

Golem: starts caged at G8; freed by the first effective pull (G2).

It never damages machinery – blocked lanes stop it. Anyone may pull chains.

Fritz: home at A7-B8 (door via C8 square). C8 chain = his self-seal reveal.

Sightlines: machinery blocks ranged fire except along open lanes.
