

WINDING ROOM — DM REFERENCE

START: weights down at E2 · E5 · I5 · I8 — sealed (upper open E, lower open W)

CHAIN	WEIGHTS	EFFECT
G2	↓I2 ↑I5	opens I5 · closes I2 <i>FIRST PULL: traps puller in gallery, frees golem</i>
G6	I5↓ ↑I2	opens I2 · closes I5 <i>re-arm chain; pulled inside = sealed in cage</i>
M3	↓I5 ↑I8	opens I8 · closes I5
K2	I8↓ ↑I5	opens I5 · closes I8
B4	E5↓ ↑E2	opens E2 · closes E5 <i>backroom</i>
C3	↓E2 ↑E5	opens E5 · closes E2 <i>backroom, endgame control</i>
L2	↓E5 ↑E8	opens E8 · closes E5
C8	E8↓ ↑E5	opens E5 · closes E8 <i>Fritz's chain: seals the puller in his corner</i>

RULES

Pulling a chain = 1 action. Chains are reusable; they grind or jam audibly. Six PINECONES (3x3 footprints), one hanging above each berth; at any moment two per level are down (four on the map). A pull lowers one, raises another. Each level always leaves exactly one lane open.

Under a descending pinecone: DC 14 DEX, dive adjacent; fail 2d6 + prone.

Trace a chain (action + easy Investigation) to learn which berths it works.

Arrow side = travel direction of the load: ↓I5 arrives at I5 from the east, I5

Golem: starts caged at G8; freed by the first effective pull (G2).

It never damages machinery - blocked lanes stop it. Anyone may pull chains.

Fritz: home at A7-B8 (door via C8 square). C8 chain = his self-seal reveal.

Sightlines: machinery blocks ranged fire except along open lanes.
